

Reaction ring for SFSF clamshells

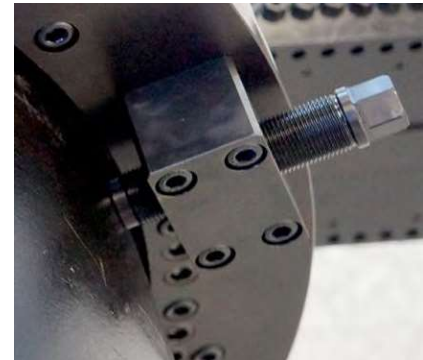

KRAIS SFSF REACTION RING IS PATENT PENDING! ALL RIGHTS RESERVED

For super heavy applications with super heavy wall and/or hard alloy pipes, consider our ORR to enhance axial and linear stability. We manufacture the ORR steel ring, which mounts on the rear of the aluminium ring. The ORR is also equipped with 4 steel location stabilizers to enhance the range and rigidity of the machine for those heavy duty applications. The ORR dramatically increases the axial stability and rigidity when cutting and/or bevelling. This solution can help to save time and expense for clamshells completely made out of steel – ask your representative for more details.

SFSF-1624 with ORR mounted on the 24" pipe schedule 120.

ORR mounted on the rear on the existing threaded holes in the aluminium ring.
