

Overhead Catalyst Cleaners

Overhead Catalyst Cleaners

Overhead catalyst cleaner systems are specifically designed for the safe removal of spent catalyst from the top of the reactor tower. The system collects the catalyst carried by the exhaust air and discharges the spent catalyst into any suitable container.

- Helps eliminate the danger of catalyst contacting the operator.
- Uses high-powered, high-performance air motor to remove catalyst quickly and efficiently.
- Cleaner systems are available for tubes from 1-3/16" up to 5" diameter (I.D.).
- Specify tube size and gauge when ordering.
