

MWTTCC – Manual Tube Cutter

Tool designed to cut or partially cut the tubes in the center support sheet of condensers, similar in design to those manufactured by Trane, Carrier and JCI.

The MWTTCC has adjustable wheel travel that accurately controls the amount of tube wall the operator can cut. Typically 98% or less is easily set up. The MWTTCC comes as standard with 120" reach (3m). On request we can manufacture up to 196" reach (5m).

We recommend our MCP-100 Manual Collet Puller as a companion tool to the MWTTCC, this allows quick and trouble free stub and tube extraction.

CUTTING RANGE	REACH	POWER
19-25 mm	3000 mm	Manual
3/4" - 1"	120"	

CUTTING WITHOUT CHIPS
